

A purpose-built solution for on-farm silo bag management, designed to streamline the collection and recycling process. This high-performance roller attaches seamlessly to a tractor via a 3-point linkage or a custom plate for Euro hitch, making it a versatile and essential piece of equipment for efficient silo bag handling.

KEY FEATURES:

| | |
|-------------------------------|--|
| Hydraulic Drive Motor: | Ensures smooth and efficient rolling of used silo bags. |
| Protected Bale Spear: | Assists in guiding and feeding the bag onto the roller. |
| High Capacity: | Handles up to 200m of total silo bag length. |
| Compact Rolling: | Rolls the silo bag into a tight, manageable ball of approx. 900mm x 1.2m. |
| Durable Construction: | Designed for longevity and reliability in demanding agricultural conditions. |
| Easy Attachment: | Compatible with 3-point linkage or custom Euro hitch plate |
| Twine ball canister: | Rolls are twine wrapped for security |

BENEFITS:

- Simplifies silo bag recycling by efficiently rolling bags for easy transport.
- Reduces on-farm plastic waste and promotes sustainable disposal practices.
- Saves time and labour with its automated rolling mechanism.
- Compatible with existing tractor setups for seamless integration into farming operations.

UPCOMING SILO BAG RECYCLING PROGRAM

We are excited to launch a silo bag recycling program! The rolled silo bags from this roller are eligible for collection as part of our initiative to promote sustainable farming practices. Stay tuned for more details on collection points and program availability.
